| Privacy in Research; Researching Privacy  
by Prof. Peter Sy  
University of the Philippines-Diliman | Use of Technology (NVivo PRO) for Qualitative Research  
by Asst. Prof. Nicamil Sanchez  
University of the Philippines-Diliman |
| Geotagging and Spatial Techniques for Field Data Gathering and Project Monitoring  
by Mr. Jonathan M. Villasper and  
Ms. Dominique Amorsolo  
University of the Philippines-Diliman | This course will present the salient provisions of the Data Privacy Act of 2012, international standards on data protection, and their implications for social science research. It will also examine the concept of privacy as an object of social inquiry.  

This course will introduce the participants to NVivo, a new software that assists researchers in organizing, analyzing, and finding insights from unstructured or qualitative data such as interviews, open-ended survey responses, articles, social media, and web content. Used by leading academic and market research organizations, NVivo also provides tools that allow researchers to ask questions of the data in a more efficient manner.  

This course aims to introduce individuals to GPS/geotagging, a smart-phone/tablet-based technique, as a technique for field data gathering and project monitoring. The workshop consists of a short discussion on the principles behind the technology, a field-based simulation around the venue, and a demonstration of the post-field data processing and compilation.
